**Piece Of World Trade Center On Display In Sutter County On 10th Anniversary Of Attack**

**Firefighters Association Building Memorial In Sutter County To Memory Of Civilians And First Responders Killed On September 11, 2001**

A section of metal beam from the World Trade Center will get a permanent home at an outdoor memorial in Sutter County, and will be displayed during a groundbreaking ceremony on the 10th anniversary of the attack on the Twin Towers.

The Oswald-Tudor Firefighters Association secured the artifact from the Port Authority of New York and has permission from the Sutter County Board of Supervisors and the Community Memorial Museum Commission to construct a memorial on the grounds of the museum.

“We believe this will be a fitting tribute to the people whose lives were lost, and to those who saved lives, that day and also will bring a bit of United States history to Sutter County,” said Sutter County Fire Department Captain Glenn Aronowitz, a spokesperson for the Firefighters Association.

The public is encouraged to attend the groundbreaking ceremony at 1 p.m. on Sunday, September 11, at the Community Memorial Museum, 1333 Butte House Road, Yuba City.

The 135-pound girder from the World Trade Center will be on display during the ceremony, along with the plaque that will be mounted to a pedestal when the memorial is constructed.

Following the ground-breaking, at 2 p.m., there will be a free screening of the World Trade Center documentary, “102 Minutes That Changed America,” inside the Community Memorial Museum.

The documentary, produced by the History Channel in 2008, depicts in virtually real time the New York-based events of the September 11 attacks primarily using raw video footage from most amateur citizen journalists.
